§ 3 Insurance contract – when and with whom concluded?

1. We conclude the insurance contract with the policyholder at the policyholder's request.
2. We deem the insurance contract concluded when the policyholder accepts our offer.
3. Where the policyholder concludes the insurance contract for the benefit of another person or persons, the policyholder is required to deliver the GTC to that person or those persons prior to the conclusion of the insurance contract.

§ 4 Insurance premium – what does it depend on and when should it be paid?

1. The insurance premium is paid by the policyholder.
2. We determine the amount of the insurance premium after we have received the following information: territorial scope of insurance, insurance option, date of start and end of the travel, number and age of all the insured.
3. The premium must be paid at the conclusion of the insurance contract, unless the parties agree otherwise.
4. We determine the premium in euro and charge it in Polish zloty based on the average exchange rate of the National Bank of Poland (NBP) in effect at the end of the day preceding the date of the insurance contract.
5. If the policyholder pays the premium:
 - 1) in cash, the day the premium is paid shall be the day of receipt of the payment by our representative,

§ 5 Insurance and coverage period – how long does it last?

Note: The insurance period is indicated in the policy.

1. The insurance period is indicated in the insurance contract.
2. Coverage, subject to sections 3-5, begins from the start date of the insurance period, but not earlier than the time we receive the insurance premium, unless we agree otherwise.

 - 2) travel assistance,
 - 3) third part liability,
 - 4) delayed delivery of travel luggage,
 - 5) treatment in Poland after a travel accident

cross it back when you return from the travel. However, the coverage does not last beyond midnight of the last day of the insurance period which we indicate in the policy.

Example: You have a policy purchased for the period from January 10 to 17. On January 10, you leave home at noon, but do not cross the Polish border until 2:05 pm. The coverage begins on January 10 at 2:05 pm. On January 17 you return to Poland and cross the border at 4:51 pm. The coverage ends on January 17 at 4:51 pm.

4. Insurance coverage:

The premium covers only the period during which we provide coverage.

Example: If you are outside Poland on January 10, and buy insurance for yourself on the same day, the coverage will begin on January 13.

Example: You have a policy purchased for the period from March 1 to May 29 (90 days). You leave home on March 10, and the coverage begins after you cross the Polish border upon departure. You are scheduled to return to Poland on May 10. Remember that the coverage for one travel lasts no longer than 45 days. - 5) an unexpected war or act of terrorism occurs – see § 8 section 2 for details regarding this point.

Note: Remember that in the situations described in section 8 points 1) – 3) and 5) the insurance ends earlier than on the date indicated in the policy.

§ 6 Sum insured – what is it and how does it work?

1. The sum insured is the maximum amount we can pay under the insurance per person.
2. The sum insured is fixed and does not change during the insurance period. However, with every event when we pay the insurance money, the sum insured gets gradually exhausted.

Note: If something happens to you and we pay the money, then, for the next claim under the same insurance, we reduce the sum insured by such payments.

Example: You have a policy with a sum insured of EUR 50,000. We have already paid EUR 5,000 for the first claim, so we will pay a maximum of EUR 45,000 (EUR 50,000 minus EUR 5,000) on the next claim you report under this insurance.

3. In accident insurance, the maximum sum insured is paid in the case of a 100% health detriment. In the case of partial detriment, we pay such percentage of the sum insured as you suffer permanent health detriment. In the event of your death caused by an accident, we pay an insurance benefit of 60% of the sum insured.
4. The sums insured and other limits of our liability are presented in Table No. 1.

§ 7 Responsibilities of the policyholder and insured

1. During the term of the contract, the policyholder is obligated to notify us of all changes in circumstances that we asked the policyholder about in the offer (application) form or other letters before we entered into the contract with the policyholder. But if you

know that the policyholder has concluded insurance for you, it is also your responsibility to notify us of all changes that affect the insurance. The policyholder or you should notify us of the changes as soon as you become aware of them.

2. When you or the policyholder fail to comply with any of your responsibilities set forth in this paragraph, we will deny the claim insofar as it affected the occurrence, course or extent of the loss. If the violation of these responsibilities occurred through willful misconduct, in case of doubt, we assume that the insurance event and its consequences are the result of these circumstances.

§ 8 Exclusions of liability common to all insurances – in what situations we are not liable?

1. We are not liable if the particular event occurred as a result of or in connection with a nuclear explosion, radioactive radiation, war, acts of war, unrests, riots, martial law, acts of terrorism, sabotage, or in relation to these events, subject to section 2.
2. **Unexpected war or act of terrorism clause:** We are liable if you are unexpectedly affected by acts of terrorism, civil war or war events. For the latter, however, you must leave the zone of these acts. We are not liable if:
 - 1) you travel to a country where acts of war are already underway,
 - 2) you take an active part in war, acts of terrorism or civil war,
 - 3) you work as a war correspondent during these events.
3. We are not liable if the particular event arises directly because:
 - 1) you are under the influence of intoxicants or psychotropic substances or substitute drugs, within the meaning of the regulations on prevention of drug addiction, or you are under the influence of medications or other substances that diminish consciousness, unless the ingestion of such substances was due to medical reasons and was instructed by a physician,
 - 2) you, intentionally or through gross negligence, caused the damage (unless the payment in the given circumstances is in line with the fairness considerations),
 - 3) you take part in illegal strikes,
 - 4) you fail to observe physician's instructions or undergo medical treatments without medical supervision or supervision of authorized persons. The exception is when someone gives you first aid after an accident,
 - 5) you attempt to commit or commit a crime,
 - 6) you attempt to commit suicide, commit suicide, intentionally harm yourself, or your body is injured at your request,
 - 7) you drive a motor vehicle without the required license or in state of intoxication,
 - 8) you take part in a flight – not operated by licensed airlines – as a pilot, crew member or passenger of the aircraft,
 - 9) You suffer from alcoholism or are addicted to psychoactive substances – psychoactive substance addiction is understood as mental disorders and disorders due to use of psychoactive substances (F10-F19) as classified in the ICD-10 International Statistical Classification of Diseases and Health Problems.

Note: Although alcoholism and psychoactive substance addiction are classified in the ICD-10 International Statistical Classification of Diseases and Health Problems as mental disorders and disorders due to use of psychoactive substances, we are not liable for damage that arise therefrom.

4. We are not liable if the particular event occurred as a result of pandemics and epidemics of infectious diseases other than Covid-19.

§ 9 How and when to report a claim?

Note: After reading this paragraph, you will know how to act when something happens. You will learn what to do so that we can provide you with assistance or pay your insurance money.

1. If:
 - 1) you suddenly fall ill, suffer an accident, or there is an event under the insurance of treatment in Poland after a travel accident – as soon as possible, but no later than 72 hours after the event, call the Emergency Call Center,
 - 2) an event occurs under the travel luggage insurance, insurance of delayed delivery of travel luggage, third party liability insurance, Sport Package – no later than 7 days after the event, notify the Emergency Call Center: by email, telephone or in writing, provide the information required so that we can assist you or pay your insurance money. Follow the recommendations of the Emergency Call Center and try to enable them to perform the actions that are necessary to determine the circumstances of the event.

Note: If you suddenly fall ill or suffer an accident, contact the Emergency Call Center right away. If, for reasons beyond your control, you cannot immediately report the claim, do so as soon as possible. Be sure to collect documentation, such as original receipts and invoices, so that we can refund costs to you based on them. The number of the Emergency Call Center is provided in the policy.

2. When you or another person report a claim, you should provide us with the documents we ask for in connection with the case – if you have them or can legally obtain them. These documents are necessary so that we can process your claim and decide whether to provide assistance or pay the insurance money.
3. If we do not receive all documents, the person reporting the claim should provide us with information about:
 - 1) place and date of the event,
 - 2) name and address of the authority or institution where other documents are or may be located.
4. We may request performance of additional tests to confirm that the insurance covers the particular event. In such a situation, we pay for the tests.

5. If the person reporting the claim has given us untrue or incomplete information, we may decide that this is the basis for refusal to pay the insurance money if it affects the determination of the circumstances of the insurance event and our liability.

§ 10 How do we provide assistance and pay insurance money? – general information

1. The claim may be reported by you or another person. Once the claim report is accepted, we conduct an investigation to determine exactly what occurred, whether the insurance covers the event, what assistance is needed and whether we will pay the insurance money. In addition, we inform the person reporting the claim what documents we need. Such information is provided in writing or in another manner to which that person has agreed.
2. We pay the insurance money within 30 days after we have received the report of the event occurrence. If we do not pay the money by this date, we notify the person reporting the claim of the reasons.
3. If we are in doubt as to whether it is appropriate to pay all or part of the benefit, we will only pay the undisputed part of the benefit until we clarify all the circumstances. We will do this up to 30 days from the date we receive your report.
4. If we determine that you are entitled to a limited scope of our assistance or smaller payment under the insurance in a particular situation, we will inform the person reporting the claim. We also indicate the circumstances and legal basis that justify our position.
5. We may refuse to pay the insurance money or withhold the payment if we do not receive all the documents we need for payment.
6. We pay the insurance money in Polish zlotys – it is the equivalent of the amounts in other currencies, which is calculated on the basis of the average exchange rate of the National Bank of Poland as of the date of our decision to pay.
7. You have an obligation to assist us in the investigation of claims for damages against those responsible for the damage – and provide us with the necessary information and documents.

Note: In case the damage was caused by a third party (a stranger with whom you will be in contact during the travel), you are obligated to provide us with information about the perpetrator of the event or the persons who are responsible for it, if you have such information.

8. If you waive any rights you have against third parties for damage caused and you do so without our consent, we may refuse to pay all or part of your insurance money. We may also request a refund of the money paid.

Example: On the slope, another skier crashed into you and you broke your leg as a result. However, you signed a statement that you were releasing the perpetrator of the accident from the cost of your treatment. In this case, we have the right to refuse to pay the costs of treating your broken leg abroad, since you deprived us of the opportunity to recover funds from the perpetrator of the accident.

Note: If the policyholder purchased a policy through our website or through helpline, we treat the contract as having been concluded by means of distance communication.

3. The policyholder must pay the premium for the time when we provide coverage – even if the policyholder withdraws from the contract.

Most often, we make settlements on a non-cash basis and pay the money directly to the medical facility that will provide the assistance. These expenses must be documented and relate to:

The decision about the transport is made by the physician in the Emergency Call Center and the attending physician. The transport takes place only after you receive assistance that will enable you to return to Poland or your country of permanent residence, and is carried out by a means of transportation that is appropriate to your health condition. If the attending physician considers transport to Poland or the country of your permanent residence possible, and you do not agree to it, you will not receive further benefits. Chapter IV. Accident insurance (NNW)

§ 21 Subject and coverage of accident insurance – what does our insurance cover?

The insurance covers:

- 1) permanent health detriment,
- 2) death,

caused by an accident.

§ 22 Exclusions of liability in accident insurance – in what situations we are not liable?

1. We are not liable in the situations we described in § 8.
2. Events that are caused by processes inside the human body: cardiac infarction, hemorrhage, stroke, sudden cardiac arrest, intracerebral hemorrhage are not considered accidents.
3. Also, the accidents are not events which occur as a result of the fact that:
 - 1) you are improperly treated or procedures are improperly performed,
 - 2) you suffer an infection – unless you are infected with a pathogenic virus or bacteria as a result of an accident (in which case we are liable). If you become infected with tetanus or rabies, we are liable – regardless of how you contracted them,
 - 3) you get poisoned after ingesting either liquid or solid substances,
 - 4) you suffer an abdominal or inguinal hernia – unless caused by an accident (in which case we are liable),
 - 5) you suffer damage to intervertebral discs, bleeding from internal organs – unless caused by an accident (in which case we are liable),
 - 6) you suffer an attack of epilepsy, lose consciousness, which are triggered by a disease.
4. We do not consider permanent health detriment or death to be the accident consequences if they occurred following 24 months of the accident.
5. Our insurance does not cover compensation for suffered pain, physical suffering and moral suffering.
6. In addition, we are not liable if you:
 - 1) practice recreational winter sports, and you do not conclude the insurance contract in the **VIP** or **The Best** options,
 - 2) practice extreme sports or competitive sports – unless you extend coverage in this regard (this is only possible with either the **VIP** or **The Best** options),
 - 3) perform hazardous physical work – unless you extend coverage in this regard.

§ 23 Accident insurance – what to do so that we could pay the insurance money?

Note: Below we have described step by step what you should do after an accident.

1. In addition to the responsibilities described in § 9:
 - 1) you should (in the case of permanent health detriment) or the beneficiary should (in the case of your death) as soon as possible, but no later than 72 h after the event, call the Emergency Call Center and report that the accident occurred,
 - 2) you or the beneficiary should apply for the insurance benefit: electronically (via our website), by phone or in writing to TU Europa S.A.,

Note: We encourage you to apply through our website – this speeds up the claim processing time.

- 3) you are obligated to notify us of the completion of treatment and rehabilitation and attach medical records of their progress. Once your treatment is complete, we can refer you to a medical board appointed by us in Poland, which will determine the degree of permanent health detriment. You are obligated to submit all medical records to the medical board and undergo a medical examination. We cover the costs of physicians' fees, appearing at the medical board, including your travel to Poland. We will refund the costs of travel by means other than public transportation, if reasonable. You can appeal against the board's decision,
- 4) the beneficiary should attach:
 - a) medical records of your treatment and rehabilitation if the beneficiary has such documents or can obtain them by law,
 - b) abridged copy of the death certificate,
 - c) document confirming beneficiary's identity – if the beneficiary is designated by name. If there is no person designated by name, the family member who requests the insurance money payment should present a document that proves kinship or affinity with you.

§ 24 Accident insurance – how do we process the report and pay the insurance money?

Note: This paragraph contains information about the method of determining the amount of the insurance benefit under accident insurance.

1. The legitimacy of accident insurance claims is established by us after it is determined that there is a causal relationship between the accident and your death or permanent health detriment.

Example: If you report a broken arm to us, we must confirm that it occurred as a result of an accident during your travel and during the period in which we were liable.

2. The physician we appoint determines the causal relationship and the degree of permanent health detriment based on the medical records we receive. We determine the percentage of permanent health detriment based on the table of health detriment standards, which is used in the adjudication of the consequences of accidents at work and on the way to work. The table is an Appendix to the Regulation of the Minister of Labor and Social Policy of 18 December 2002 (item 1974). The table is available at www.tueuropa.pl.
3. We determine the degree of permanent health detriment when you complete treatment.
4. If you receive money under the permanent health detriment insurance, and then your death occurs within 12 months of the accident as a result of the same event, the insurance payment to the beneficiary for your death is reduced by the amount we paid you previously.

Example: You have a policy with a sum insured of EUR 3,000 (in case of death we can pay a maximum of EUR 1,800). As a result of a permanent health detriment that occurred during the travel, we paid you compensation of EUR 1,000. Due to complications following this accident, you die. Then the beneficiary will receive EUR 800 from us (EUR 1,800 compensation due for your death minus EUR 1,000 compensation for permanent health detriment that we previously paid). However, if we paid you compensation for a permanent health detriment of EUR 2,500, and later death occurs, in such a case the beneficiary is no longer entitled to compensation.

5. If you die before we determine the degree of permanent health detriment and if the death is not causally related to the accident, we estimate how much insurance money we should pay to the beneficiary. We make a decision based on medical records and physicians' opinions.
6. If you die as a result of the accident, we determine whether and how much to pay under the insurance. We do this on the basis of:
 - 1) documents that are necessary for the purpose,
 - 2) death certificate and documents that indicate the cause of death,
 - 3) documents that establish the kinship or affinity of the beneficiaries, or other documents that show that the beneficiaries are your heirs,unless the beneficiary is a person that does not have such documents and cannot obtain them under the Polish law.
7. We pay the insurance money for death to the beneficiary.
